Keshav Consulting Solutions (KCS) helps clients deal with changing business and technology issues. Clients choose KCS because of the outstanding value and results that we deliver.

Our relationship with clients is a partnership — we bring our experience, best practices and tools, and apply them to our clients' unique requirements.

Three fundamental objectives guide the operation of our business:

To use our expertise to the benefit of our clients and partners through an open, collaborative approach;

To ensure sustainable and profitable long-term growth; and

To promote employee development.

In addition to these goals, a formalized set of shared values guide our business decisions and shape our culture.

The practical expression of these values and objectives can be seen in the collaborative relationships we build, the standards by which we measure our work, and the commitments we make to our people.

In today's fast paced, global economy, companies' business issues are ever changing, requiring adaptability in order to stay competitive and maintain profitability. Businesses must share information quickly, not only within their own organization but also externally, up and down the supply chain. Many businesses have a maze of information silos that don't communicate with each other. Meanwhile, the complexity and cost of maintaining information is ever increasing.

By getting to know our clients and the vision that guides them, we are better equipped to anticipate and devise solutions that meet their mission critical goals.

We develop Business Strategies and Technologies tailored to your unique requirements.

On the field, we bring our passion, integrity and innovation to each of our client projects. Whether it is applying the best techniques or bringing the latest thinking on process or architecture, all our projects are unmistakably KCS engagements.

Our Services

Application Development Services

KCS Application Development Services revolve around service-oriented architecture, including J2EE, .NET, and PHP as well as Client Server or Mainframe development, and Business Intelligence and Data Warehouse services to create solutions that address your business needs and technical requirements. With expertise and resources in the primary development environments, KCS can build or modify your mission-critical applications to ensure reliable delivery of the services you need to compete in today's marketplace.

ERP Solutions

KCS Enterprise Solutions is the reliable source for Enterprise Resource Planning (ERP) application and business knowledge. We help clients in a wide range of industries meet their tactical, strategic, and business goals through successful, cost-effective implementation, integration and support of leading enterprise software packages and technology infrastructure, including Oracle, SAP, Lawson, and Microsoft solutions.

Quality Assurance & Testing Services

Your applications play a critical role in delivering products and services quickly in today's always-on, IT-pervasive world. Our Quality Assurance & Testing Services deliver a comprehensive solution that minimizes application failures and helps you achieve business results you can measure. We improve the quality of your business applications by reducing defects. In addition, rework costs are reduced throughout your systems development life cycle, not just at the testing phase.

Project Management

We offer comprehensive, customized support to owners and managers of projects of all types and sizes. KCS associates offer great breadth and depth of project experience, and their expertise is further augmented by their commitment to a team approach. While each work contract has a specific staff assignment, our project managers consult closely

within KCS's own Project Management office to ensure that special, relevant experiences and skills are applied to each client's situation. When applied to a project, this wealth of expertise results in reduced project ramp times, more effective anticipation of potential trouble areas, smoother project phase transitions, and the ability to successfully meet project deadlines and budgets.

Infrastructure Services

Today's marketplace demands that your information technology (IT) infrastructure be efficient, flexible, dependable and compliant while optimizing your IT return on investment. KCS, can help you achieve this by making your IT environment safe, secure, efficient and adaptable. We deliver a comprehensive set of infrastructure services and support.

Geospatial & Geographic Information Systems Services

Over the past 5 years, KCS's Geographic Information Systems (GIS) team has guided several successful projects featuring ESRI® and other leading platforms. KCS's GIS solutions practice creates high impact, mission-critical solutions, seamlessly integrated into the enterprise.

Professional Services

KCS's Professional Services deliver high-quality staffing services built on industry best practices. We work with our customers to recruit and retain the best IT talent possible. Our staffing model is comprised of two core services: IT Contract Staffing and Direct Hire Placement.
